

ID SCULPTURE

PLAY. CLIMB. EXPLORE.

The impulse to Play, Climb and Explore connects all of us.

In our world, playgrounds are challenging, inspiring spaces for kids and adults to enjoy together. ID Sculpture’s team of designers and fabricators infuse adventure and authenticity into everything we make, from nature-inspired playgrounds to whimsical sculptures and public art. Combining old world sculptural techniques with modern digital technology allows us to design for virtually any form or theme. Our unique process creates sculptures that are durable and architecturally accurate with an unparalleled level of detail and customization.

Safety is at the heart of all we do.

Compliance with nationally recognized standards provides a safer environment for children and the general public. All of our playground features conform to ASTM F1487, the “Standard Consumer Safety Performance Specification for Playground Equipment for Public Use” as well as the Consumer Product Safety Commission (CPSC) Guidelines. We proudly offer a range of products certified under the International Playground Manufacturers Association, Inc. (IPEMA) Product Certification Program. We also design with inclusivity in mind, creating shared experiences accessible to all.

The IPEMA Certified logo will be used to signify products that are IPEMA certified to ASTM F1487.

themed play

Operating at the intersection of art and play, we go beyond theming, with a dynamic collection of sculptural climbers ranging from the larger-than-life to the otherworldly.

Riverfront Park | Spokane, WA

Riverfront Park in Spokane, WA is a collaboration between Bernardo Wills Architects and Northwest Playgrounds. The park tells the story of the prehistoric Missoula floods with sculpted rock, moving water, and fossils.

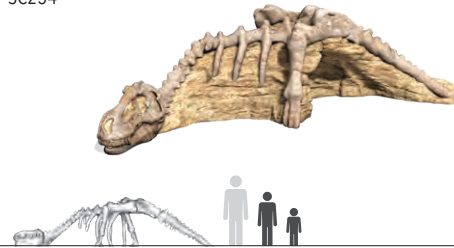

Bayfront Park | Sarasota, FL

The city of Sarasota, FL turned to IDS for our unique ocean-themed play elements and durability in harsh marine environments. This iconic playground is now the hub of a newly developed 50-acre waterfront park.

“When we discussed the expansion of Blanchard Park, we knew we wanted a unique play structure that highlighted our woodlands and preserved the natural state of the area.

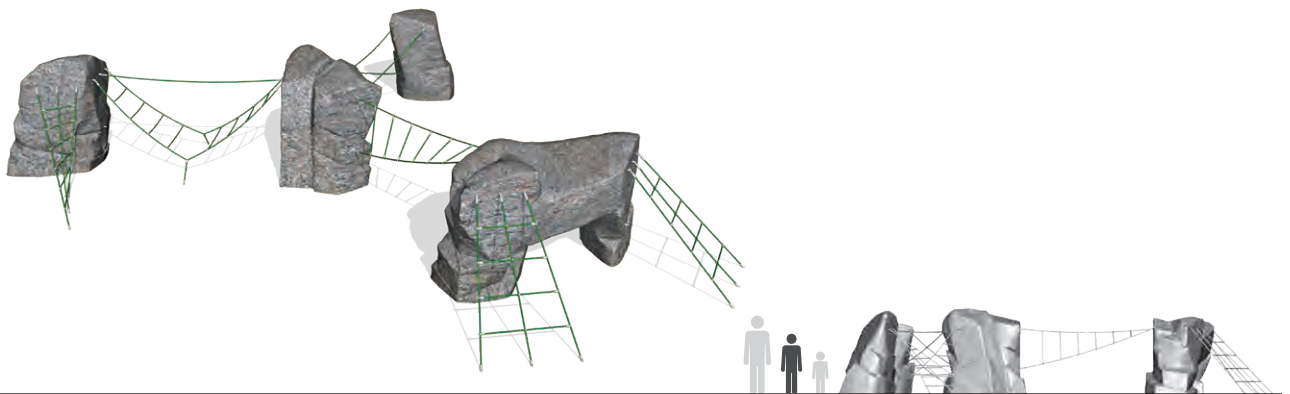

ID Sculpture heard what we were looking for and worked with us to put together an engaging and unique structure that is now sought out by families. Since installation, we have seen a 23% increase in park usage, which we directly attribute to this new, unique play structure. We couldn't have done this project without ID Sculpture and appreciate their collaborative approach.”

Dennis Hodges

Public spaces should be unexpected
and engaging. We specialize in
interactive environments that bring
people and communities together.

New ideas require experience to be successful.

Over the years we've been fortunate to collaborate with communities, artists, and designers to realize one-of-kind playground, park and public art projects.

ABOUT **Village Greens Greenwood Village, CO**

Village Greens was a collaboration with The Architerra Group to bring intergenerational play and climbing to the community of Greenwood Village, CO. This XL Performance Boulder has a host of features that cater to climbers of all abilities, including some heavy overhangs for experienced climbers and a pothole arch for beginners.

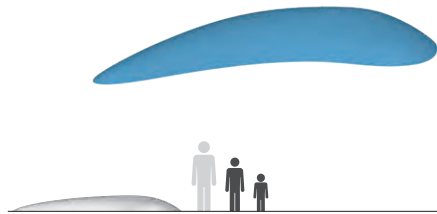

Let us bring your vision to life.
